PSI NATIONAL PRACTICAL TEST- IMPORTANT GUIDELINES

Prior to registration, test takers should familiarize themselves with the following instructions to be properly prepared to sit for a test. For practical test questions or concerns, test takers and instructors please contact PSI Customer Service at 855-744-0314.

Georgia State Board of Cosmetology specific testing rules:

Please take note:
The state of Georgia requires the following supplies and equipment to test. If the test taker is not in compliance with any of the following requirements, the test taker will be dismissed from the test session and required to reschedule and pay for a future test.

- **Candidates must arrive in neat, clean, professional attire. Uniforms are not required. You must wear a sleeved smock/lab coat. Your must wear closed-toe shoes. If you do not have the appropriate attire, you will not be allowed to take the Practical examination.**

General rules for testing:

- During the practical test, test takers must follow all appropriate rules for client protection that will ensure the health, safety, and welfare of the public.
- A proctor will be monitoring time during the test. Personal timers are not allowed in the testing room. Test takers will not receive a score for any activities not completed within the allotted topic area time limits. When the proctor gives an instruction to “Please stop working”, test takers are to immediately stop what they are doing, stand quietly, and wait for the next instruction to be given.
- Test takers are required to prepare and bring a closable container (“supply kit”), with all products, supplies, and equipment necessary to perform the topic areas included in the Practical test. The suggested container dimensions should not exceed 24” wide, 24” long and 24” high. This will allow the test taker to place the supply kit under the table when not in use. There are no *supply lists* or *suggested supplies* for the PSI National Tests. PSI recommends the test taker bring the equipment and supplies needed to perform a topic area as they would in their own professional environment.
- Test takers are *required* to bring to the test, two containers to dispose of used items. One marked “single use” and one marked “multi use”. All items used in the test are categorically disposed of in one of these containers.
- Products that are *not* grouped as “dangerous chemicals” by OSHA and are required to be listed on an actual business SDS sheet, may be fictious with a self-created or actual label attached. Some other substance may be used inside the container to simulate a product.
- Chemical products that are required to be listed on SDS sheets in an actual business, are required to be used from the original container with an original manufacturer's label attached or in a container with the manufacturer's label attached.
- Labeling on products must be in large print, legible, and clearly visible for the evaluator to observe.
- Absolutely NO aerosols are allowed into the testing area.
- Disinfectant containers must have the manufacturer's label attached and legible. Disinfectants used must have **virucidal, bactericidal, and fungicidal** properties listed on the manufacturer's label.
- Monomer being used for the test must be factory-sealed and manufacture-labeled as a “low odor or odorless” product. Product not meeting the test requirement will not be allowed into the testing room.
- Test takers may not observe other test takers during the test. PSI views and responds to this behavior as form of cheating. The test taker will be warned up to and including dismissal from the test. Please focus on individual tasks and do not depend on viewing the performance of other test takers to be successful.
- Test taker's name and/or school names are to be covered on their person and supplies while in the test.
- The number one safety rule in the industry is: “Following Instructions”. There is no necessary or required style or technique a school needs to teach, or a test taker needs to perform. All topic areas are observed in the manner a Barber II would normally complete a task. Tasks should be taken seriously and performed as instructed in the test and to the highest skill level they are capable. Scores are based on the test taker displaying a solid knowledge of workplace Infection Control and Safety Precautions.

WORKPLACE INFECTION CONTROL PRECAUTIONS

Test takers need to be familiar and follow all workplace infection control precautions. Here are some examples of the expectations of the test as well as an everyday business to familiarize a test taker with some of the industries infection control standards.

- Cleaning hands before starting a service. Knowing when hands become contaminated and keeping them clean as to not infect a client or themselves.
- Keeping the supply kit from becoming contaminated, such as: returning items to the kit, leaving a kit open or otherwise contaminating a kit. The supply kit represents a clean and disinfected storage in a barber's workstation and should be treated as such.
- Knowledge of single-use and multi-use items and where to dispose of them properly.
- Disinfecting workstation surfaces and keeping them from becoming contaminated. If a worksurface becomes unhealthy a test taker has the knowledge to know when they would require the station to be cleaned and disinfected.
- Knowing how to use and dispense products without contamination. For example, double dipping, or any other cross contamination with the skin or worksurfaces.
- When items are set on a contaminated work surface, they may not be inserted into product containers or touch dispensing tips of bottles and jars.
- Keeping clients from becoming contaminated by the barber.
- Keeping containers being used free from contamination.
- Making sure tools are clean and disinfected.
- If a body fluid becomes present during a service (i.e., blood, vomit, feces), how a professional deals with the situation without contaminating themselves and others.

WORKPLACE SAFETY PRECAUTIONS

Test takers also need to be familiar and follow all workplace safety precautions. Here are some examples of the expectations of the test as well as an everyday business to familiarize a test taker with some of the industry safety standards.

- A Barber must know and have a working understanding of workplace safety regulations issued by federal and state regulatory entities.
- Cross-contamination of chemicals and products on the workstation.
- Chemical mixing procedures, storage of chemicals, and SDS sheets.
- Keeping the workstation safe from injury, cleaning up spills, and picking up dropped items. Reducing a slip and fall or tripping incidents.
- Making certain tools and equipment are in safe working order, no frayed or exposed wires, rusty metals, etc.
- Tools and equipment are used in a safe manner.

KITS/SUPPLIES AND EQUIPMENT

Test takers are required to prepare and bring a closable container ("supply kit"), with all products, supplies, and equipment necessary to perform the topic areas included in the Practical test. The suggested container dimensions should not exceed 24" wide, 24" long and 24" high. This will allow the test taker to place the supply kit under the table when not in use.

There are no *supply lists* or *suggested supplies* for the PSI Practical National Tests. PSI recommends the test taker bring the equipment and supplies needed to perform a topic area as they would in their own professional environment. There are no right or wrong supplies or right or wrong techniques to demonstrate a topic area. Professionals learn and do tasks as they learn in school, apprenticeship programs, or manufacturer training. Please demonstrate topic areas with the equipment and supplies and as taught in school or during apprenticeship or training and as test takers will continue once licensed, demonstrating their *utmost attention* to public health and safety. (See and follow the Infection Control Precautions and Safety Precautions listed in this guide for examples.)

In the case an evaluator has observed and scored a test taker in violation of this policy, the test results may be voided.

PSI THEORY TESTING EQUIPMENT

The PSI National theory tests will be administered using a computer, a mouse, and computer keyboard.

IDENTIFICATION SCREEN

Test takers will be accompanied to a testing station. Once test takers are seated at their testing station, they will be prompted to confirm their name, identification number, and the test for which they registered.

TUTORIAL

Before a test taker begins a test, an introductory tutorial is provided on the computer screen. The time used to watch the tutorial is not deducted from any test timing. The tutorial takes up to 15 minutes. Sample questions are introduced during the tutorial, so a test taker may familiarize themselves on how questions are written and how to review the answers given.

TEST QUESTION SCREEN

*The "*function bar*" at the top of the test question provides mouse-click access to any features available while taking the test*. During the test, one question will appear on the screen at a time. There is also a timer feature at the top of the screen that displays the time a test taker has remaining to complete the test.

Note:

Even though a test taker has entered a response to a question, the system will allow the response to be changed anytime the test is active. Once a test taker signs out of a test or timing expires, this feature will no longer be available.

EXPERIMENTAL QUESTIONS

In addition to the number of test questions specified in the "Test Content Outline". There are a small number of "experimental questions" administered to test takers during the tests. There are typically at least five (5) experimental questions on a test. The results of these questions are not included in the final test taker's score. Administration of such unscored experimental questions is an essential step in developing future PSI tests.

PSI SCORE REPORTING INFORMATION

The content outline lists topics that are on the test and the number of questions for each topic. We advise test takers not schedule a test until they are familiar with the topics on the outline. To better prepare for the PSI National Barber II Theory test, test takers can now review by taking an online practice test. Practice tests are intended to aid test takers with example test questions. The purpose is to familiarize a test taker with the general types of questions that will appear on a Barber II test. Though questions are based on Barber II, these questions are NOT a substitute for education and study. Scoring well on the practice test also will not guarantee a positive outcome on the actual licensing test. This is the ONLY official PSI practice test; PSI does not recognize nor endorse any other study guides that may be offering information on the PSI National Barber and Cosmetology Program. The PSI practice tests are offered to review an unlimited number of times; however, a fee is assessed for *each time the test is utilized for review*.

EXAMINATION REVIEW

PSI, in cooperation with Georgia Board of Cosmetology and Barbers will be continually evaluating the tests being administered to ensure that the tests accurately measure competency in the required knowledge areas. Comments may be entered during the test by clicking the Comments link on the function bar of the test question screen. Test taker comments regarding the questions and the tests are welcomed. Comments will be analyzed by PSI test development staff. While PSI does not respond to individuals regarding these comments, all substantive comments are reviewed. If a discrepancy is found during the comment review, PSI may re-evaluate test taker' result and adjust them accordingly. This is the only review of the Theory test available to test takers. There is not a review process for the Practical portion of the test.
